English the Language of the Church! Chicago III May 22 Information was obtained today that the charch authorities at Rome have just transmitted to the Catholic church in the United States the most significant ruling of recent years bearing on ecclesiastical matters in America.

lows
I Children born in America of for-

Children born in America of forcing parents, whose navive language is not the English are not obliged, where of a size to become members of the parish to twhich their liparents belong, but they have the light to join a parish in which the language of the country—that is English—is used 2 Catholies not born in America, but knowing the English is no use, and they called the compelled to subject the parish in which English is in use, and they called the compelled to subject themselves to the jurisdiction of a rector of a church is the language of a foreign country. The evident purpose at Rome is to make English the language of the American church as apeculity as possible, and thus to encourage the development of a spirit of more perfect tendon among the perfect of the called and the state of the Catholic failt.

members of the Catholic faith

Pal labes in which a foreign language
is used are tolerated as temporary institutions, which will disappear as soon as
the conditions making their erection expedient will have passed away. The
present ruling is perfectly consistent
with the enlightened general policy
adopted and followed by Leo XIII.

The New York Sun says : So long as the Chicago, platform remains the standard of the regular Democracy the Democratic party a radical, revolutionary, party, and the Republican party, and nor, the Democ racy, is the custodian of the principles of Thomas Jefferson.

Mr. William C. Whitney says that if 'such's messure as the Dlugley bill had been outlined before the election it alght have been disastrous to Mr. Me-Kinley." Mr. Whitney is talking nonsense and he knows it. Ho, tried that little gamor in the carry days of the campaign, but the only result of bla outbreak agains; the attitude of the Republicans on the lariff was his own disappearance from the canvage.

The free silver Democracy of Massa. chusetta, now propose to have a dinner to atrike the keynote for the party in that Sinte. Senator Jones, the chalrman of the Democratic National Committee, will be the principal guest of the occasion. It is apparent that the Democratewill have to accept the sliver craze or continue to be considered as bolters. The effort to reunite the party on the ariff question to the exclusion of silver has proved an utter fallure."

The call for the Ohio Democratic State Convention, which meefe June 20th in Columbus, puts at rest any doubts which may have existed as to the attitude the party will assume on the currency question. In selecting delegates the call says that all persons may participate who voted for Mr. Bryan last November, who may find themselves now in accord with the Chicago platform, and Pespecfally those who favor the free and unimited coinage of allver at the present legal ratio of 16 to L." The only mystery about the language of the call is why so many words were used to expres the meaning. A simple perblanion for every one to vote at the primaries who favors a fifty cent dollar and la "agio" the Supreme Court would have been sufficlent. The situation is, however, plain. The Democratic party in Ohio, will go into the campaign as the advocate of a lishonest dollar as it did in 1976 when it champloned tree and unlimited green backs. The party has not grown an luch in twenty-two years sluce.

A short distance from Washington, on the Potomac River, is operated the largest seine in American waters, and probably in the world. The lishing grounds are at Stony Point, VE., nearly oppusite Iodian Head, about twenty-two miles point being a mile and three-quarters wide. The self is owned by Captain William Neitzey, of Washington, and used only during the shad and herring season, or nine or ten weeks each spring, beginning about the middle of March. Although the seine bast been hauled on shorp year after year for nearly a third of a century, few people, except those. directly interested, are aware of its size and importance. The length of the selne Clear theo out with la 9,000 feet. Attached to each ,end are large, heavy ropes, leading to the shore, bus rope belog 8,100 and the other 9,000 feat long, a combined length of selno and rope of 27,600, feet, or considerably over five miles. The largest number of shad ever taken with this scine at a single haul was 0.000, and of herring about 350,000.

The Chicago Times-Herald thinks the free silverites are overworking the cry about the "atrain on gold." It says to make this dreadful "strain" more impressive the aliver orators and lecturers sometimes exhibit charts on which is shown all the gold in the world reduced to the size of a very small cube. Side by side with this are shown a cube of allver, very much larger, and a cube of all other commodities of enormous proportions, and the spectator is called upon to sympathize with the poor little cube of gold as if it were unable to fuldi the obligations imposed upon it. The line-trations is falso and forced. One might STOVES STORED obligations imposed upon it. The line as well sympathize with the determined little steam jug that hitches itself to one of the leviathans of the deep and brings it safely to its dock. There is no under J. A. Frirbanks & Co. gold. That cube of gold, like the Jinn in the Arabian tale, has been compressed 3 into its smallest compass. Let it be released and it will show the mighty and all-powerful giant that it is. The figure of speech is convenient for the demagogaes, but It is a very foolish one compelled. Capital paid up to cash spoon lit. Just as it is a demand made apon it. Just as it is a demand compoling of the composity with overy demand made apon it. Just as it is a demand compoling castly with overy demand compoling castly with overy demand compoling castly with overy demand componity. There is no more atrain upon gold than made upon it, just as it is now doings;
